

May 31, 2005

The Honorable Chairman and Members of the
Hawaii Public Utilities Commission
465 South King Street, First Floor
Kekuanaoa Building
Honolulu, Hawaii 96813

Dear Commissioners:

Subject: Docket No. 03-0417
East Oahu Transmission Project

Pursuant to Order No. 20968, filed May 10, 2004, in the subject proceeding, the stipulated prehearing order ("SPO") and the schedule of proceedings in the SPO (filed on April 23, 2004 and attached as Exhibit 1 to Order No. 20968) were approved by the Commission, subject to a modification to reflect the public hearing date of September 1, 2004.

Time intervals for the filing of written testimonies, exhibits and workpapers of "Other Parties", and for subsequent filings, were included in the schedule of proceedings. The date for filing such written testimonies was four weeks "after completion of the ER process", but not earlier than January 15, 2005. The SPO notes that "[t]he time intervals are approximate. When the ER process is deemed complete, specific dates would be determined by the parties and submitted to the Commission for approval." The SPO also states that "[t]he Environmental Review ('ER') process shall be deemed to be complete when the Commission reviews the EA and determines that an EIS is not required, or if an EIS is required, when the Final EIS is accepted." (SPO, page 5 and footnote 3.)

The environmental review process is deemed complete. On April 8, 2005, the Commission issued a Finding Of No Significant Impact ("FONSI") regarding the Final Environmental Assessment for the East Oahu Transmission Project 46kV Phased Project. The Office of Environmental Quality Control ("OEQC") published notice of the FONSI on April 23, 2005. No appeal was filed during the 30-day public review, which ended on May 23, 2005.

May 31, 2005
